

EXPLORING NUMBER CITY

- ▶ The city is built on the side of a waterway. There are very expensive flats in the blocks by the waterside, and very expensive houses away from it which stand in their own grounds.
- Now that you know how the numbers match the buildings, try with your partner to explain the following two observations.
 1. The buildings are only ever single blocks: you never get two side by side facing the river.
 2. Some buildings, though they stand a distance from the waterside, have an uninterrupted view of it. Put your head down and squint through the gaps:
