

NUMBER CITY

12

$$2^2 \times 3 = 12$$

● Study the figure on the left to see how numbers are made in Number City.

● The red template is for 2 and 3. Its length is 6, the lowest common multiple of 2 and 3. Fit it all the way along the top: 0-6, 7-12, 13-18,

■ How is this possible?
